Professional Summary

Motivated IT graduate with hands-on experience in software development, web technologies, databases, and data analysis. Skilled in building secure backend systems, responsive web applications, and data-driven solutions. Strong foundation in programming, problem-solving, version control, and teamwork. Actively seeking an opportunity to learn, contribute, and grow across diverse IT domains.

Technical Skills

Programming Languages: PHP, JavaScript, Java (Basic), C/C++ (Basic), Python

Web Technologies: HTML5, CSS3, Bootstrap, Responsive Web Design

Databases: MySQL, phpMyAdmin, Firebase

Tools & Platforms: Git, GitHub, XAMPP, Composer, VS Code, Sublime Text

Core Concepts: Backend Development, CRUD Operations, OOP, Database

Normalization, Secure Authentication, Debugging & Testing

Internship Experience

Mobile App Development Intern – Rev & Ride, Kathmandu (Dec 2024 – Mar 2025)

- Contributed to the design and development of mobile application
- Built UI components and improved screen flow
- Performed testing, debugging, and feature improvements
- Collaborated with team on UX and functionality

Python Django Web Developer (Trainee) – Code ITS (2026 – Present)

- Developing web applications using Python and Django
 - Building backend APIs and database operations
 - Working with Django REST Framework (DRF)
-

- Implementing authentication (JWT login/register)
- Using Git/GitHub for version control

Projects

Secure Login System with CAPTCHA

- Developed a secure authentication system using PHP, MySQL, HTML, CSS, and JavaScript
- Implemented CAPTCHA to prevent automated access and enhance security
- Designed backend logic for session handling and data validation

Student Depression Data Analysis

- Analyzed public datasets using Python
- Visualized trends using matplotlib and seaborn
- Strengthened data analysis and interpretation skills

Meal-Mate Android Application

- Developed a Kotlin-based Android app for nutrition tracking
- Integrated Firebase for real-time data storage
- Contributed to UI design and usability improvements

Food Delivery System (Django Web App)

- Developed full-stack web application using Django
 - Implemented authentication using JWT
 - Built APIs for ordering and delivery system
 - Designed UI using HTML, CSS, Tailwind
-

Education

BSc (Hons) Computer Systems Engineering (IT)
ISMT College (University of Sunderland)

Activities & Experience

Volunteered in Job Fair

- Assisted in organizing and coordinating the college job fair event
- Supported employers and recruiters with registration and logistics

Soft Skills

- Analytical and problem-solving mindset
 - Fast learner with adaptability to new technologies
 - Strong communication and teamwork skills
 - Attention to detail and commitment to quality
-
